## PORTFOLIO

[GitHub link ↗](#)

## PROJECTS

### [AI powered fitness recommendations system ↗](#)

Sep 2025 - Oct 2025

Developed an AI-powered fitness recommendation system to personalize workout plans. As a key contributor, I implemented machine learning algorithms for user profiling and content-based filtering, leveraging Python and TensorFlow. This resulted in a 15% increase in user engagement and improved workout adherence within the pilot program. Skills:- Apache Kafka, Google Gemini model, Docker

### [Student Management System ↗](#)

Sep 2025

Email replayer ↗

Jul 2025

1 Users enter the original email content into the app. 2 Users select the desired tone for the reply: Friendly Formal Professional Polite Casual 3 The app sends the input and selected tone to the Google Gemini API. 4 It returns a polished, context-aware suggested reply ready to use.

Government polytechnic Vikramgad website using PHP

Jan 2024 - Apr 2024

In this project we develop the full website by using PHP,HTML5, CSS3, Javascript, Bootstrap.
